Environmental concerns:

School considers a great concern for environmental issues as one of the prime areas to be understood by students studying in the school. We have an environment friendly approach with high emphasis on three R (Reduce, Reuse and Recycle). Students volunteer from class 11 and 12 as part of NSS and volunteer cadets from class 8 to 12 as part of NCC covers environmental issues as one of the important activities to be carried out and runs awareness drive in the surroundings of the school to involve society and within the school to involve all students, plantation drive is at the same time carried out every year and a greater number of parents are being involved through 'Maa ke nam ek Ped' movement. Students are made this point clear that 'save water', 'save energy' are not just some slogans they are life enriching and life enhancing slogans and must be reflected in our day-to-day actions.

Sports achievements:

School promotes sports as one of the essential aspects of school education and strongly believes that all-round development of the students is possible by putting sports and study together. Our students participated in Ju-Jitsu International event at Thailand, CBSE cluster swimming, state Badminton and Chess tournaments. At the same time school also organised interschool 7 -a- side football tournament for students up to class 10 and up to class 5, interschool chess tournament up to class 8. Many of the students got scholarship under CM Emerging sportsman category.

PTA and SMC:

We believe in involving all the stakeholders of education on one platform together for best of the outcomes in our children. PTA meets are a regular phenomenon in the school and at least once in a month these meetings are being conducted with goal-oriented actions and data analysis along with sharing of multi-source information about student's behaviour and academic performance. The results of PTA meets are carefully analysed by a team of teachers led by respective class teachers and individual action plans are being made to bring desired outcomes.

SMC takes keen interest for the overall good of the students and anything in terms of policy or infrastructure that is necessary is being acted on by the team SMC. At the same time SMC taking enough care that as per norms laid down by CBSE in respect of required things in terms of policy, infrastructure, man power, facility etc it is being made available in the school system. Technology integration for teaching learning, learning new skills, running NCC and NSS, sports-scientific activities and making basic facilities available in the school is the prime area of looking after for SMC. There is no delay on part of SMC to take a useful decision for the good of students and school.
